About the workshop

Throughout the world, the public sector is under pressure to deliver better services, often with reduced resources. Public Sector organisations need to take a strategic approach to applying their resources optimally. This workshop focuses on helping you to develop financial strategies that are coherent and targeted at achieving your objectives. We will examine how resources can be effectively planned, monitored and controlled. The workshop examines roles and responsibilities in managing budgets and how these roles and responsibilities should be fulfilled and supported.

Week one will focus on: Strategic Public Financial Management

- The big picture, managing financial resources – best practice approaches to both revenue and capital and budget setting and a monitoring process that enables timely remedial action when things go wrong
- Ensuring financial management contributes fully to effective overall corporate governance and the achievement of strategic objectives
- The linkages between finance, human resources, information and asset management strategies
- The role of the finance function.

Week two will focus on: Developing Best Practice Financial Management

- Doing the fundamentals well – best practice in fundamental financial processes, including payments, treasury management, income collection, cashiering and payroll.
- International Accounting Standards (IPSAS and IFRS) – these Standards have considerable implications for financial management and for the allocation of resources. We will deal with the requirements and implications of the Standards and effective mechanisms for improving financial management and reporting
- How jurisdictions seek accountability, responsibility and financial discipline
- Successfully applying technology – Integrated Financial Management Information Systems (IFMIS), alongside electronic transactions, have brought step changes in the performance of many organisations. How can technology be harnessed to provide real improvements in financial and resource management?
